## Subject Index

### Alloys

- bombardment-induced compositional change with alloys, oxides, oxysalts and halides
- III. the role of chemical driving forces, 11
- detailed analysis of the amorphization process in low-temperature ion-bombarded metallic alloys, 127
- ion-induced crystal-to-glass transition in alloys, 107
- temperature dependence of amorphization and precipitation processes in  $\text{Ni}^{+}$ - and  $\text{Ni}^{+}$ -implanted  $\text{Ni}_x\text{Ti}_{1-x}$  alloys, 133

### Aluminium

- amorphization process in manganese-implanted aluminium thin films and single crystals: effects of strains and target temperature, 139
- effect of ion implantation on fatigue, fretting and fretting-corrosion of Ti-6Al-4V, 307
- megaelectronvolt ion beam polishing of anodically grown alumina, 63
- nitrogen ion implantation into the intermetallic compound TiAl, 355
- pressure effects of krypton bubbles on the host aluminium lattice as probed by  $^{57}\text{Co}$  impurity atoms, 103
- surface mechanical properties of CuNi and FeAl films produced by dynamic ion mixing, 267
- transmission electron microscopy investigation of the structural transformations in titanium or TiAl implanted with nitrogen, carbon, oxygen and boron, 83
- transmission electron microscopy study of amorphization and precipitation in  $\text{Ni}^{+}$ -implanted aluminium, 145
- X-ray studies of krypton, xenon and lead inclusions in aluminium single crystals, 97

### Amorphization

- amorphization process in manganese-implanted aluminium thin films and single crystals: effects of strains and target temperature, 139
- detailed analysis of the amorphization process in low-temperature ion-bombarded metallic alloys, 127
- temperature dependence of amorphization and precipitation processes in  $\text{Ni}^{+}$ - and  $\text{N}^{+}$ -implanted  $\text{Ni}_x\text{Ti}_{1-x}$  alloys, 133
- transmission electron microscopy study of amorphization and precipitation in  $\text{Ni}^{+}$ -implanted aluminium, 145

### Annealing

- annealing behaviour of nitrogen-ion-implanted 304 stainless steel, 253
- mixing and annealing effects in the krypton-irradiated Fe-Pd system, 165

### Argon

- nitride formation at metal surfaces by  $\text{Ar}^{+}$  ion bombardment in nitrogen atmosphere, 203
- surface deformations caused by high-dose high-energy helium, neon and argon ions, 57

### Austenite

- phase transformations of a nitrogen-implanted austenitic stainless steel (X10 CrNiTi 18-9), 229

- wear resistance improvement and structural modifications of  $\text{B}^{+}$ -implanted austenitic stainless steel, 245

### Boron

- examination of wear, hardness and friction of nitrogen-, boron-, carbon-, silver-, lead- and tin-implanted steels with different chromium contents, 261
- surface precipitation of natural and ion-implanted lithium and boron in metals, 89
- transmission electron microscopy investigation of the structural transformations in titanium or TiAl implanted with nitrogen, carbon, oxygen and boron, 83
- wear resistance improvement and structural modifications of  $\text{B}^{+}$ -implanted austenitic stainless steel, 245

### Carbon

- effects of  $\alpha$ -particle irradiation on carbonitrides produced in a nitrogen-implanted low-carbon steel, 31
- examination of wear, hardness and friction of nitrogen-, boron-, carbon-, silver-, lead- and tin-implanted steels with different chromium contents, 261
- structural characterization and fatigue behaviour of a carbon-implanted pure polycrystalline nickel, 323
- structure and properties of titanium carbide grown by dynamic ion beam mixing, 209
- transmission electron microscopy investigation of the structural transformations in titanium or TiAl implanted with nitrogen, carbon, oxygen and boron, 83

### CEMS

- titanium implantation into a high speed steel: distribution parameters and CEMS characterization, 37

### Ceramics

- ion implantation in ceramics—residual stress and properties, 361

### Chemical driving forces

- bombardment-induced compositional change with alloys, oxides, oxysalts and halides
- III. the role of chemical driving forces, 11

### Chromium

- diffusion of implanted sodium in nickel and chromium, 43
- microstructure and mechanical properties of high dose nitrogen-implanted iron, chromium and titanium sheets, 291
- phase transformations of a nitrogen-implanted austenitic stainless steel (X10 CrNiTi 18-9), 229

### Cobalt

- pressure effects of krypton bubbles on the host aluminium lattice as probed by  $^{57}\text{Co}$  impurity atoms, 103
- temperature and fluence effects in lead-implanted cobalt single crystals, 49

### Composition

- bombardment-induced compositional change with alloys, oxides, oxysalts and halides
- III. the role of chemical driving forces, 11
- composition and sliding contact behavior of oxidized titanium-implanted 52100 steel, 279

- Compound formation
  - compound formation effects in computing implantation profiles, 67
- Copper
  - metallic glass formation in Cu-Nb by ion beam mixing, 123
  - surface mechanical properties of CuNi and FeAl films produced by dynamic ion mixing, 267
- Corrosion
  - effect of ion implantation on fatigue, fretting and fretting-corrosion of Ti-6Al-4V, 307
- Crack initiation
  - effect of ion beam surface modifications on fatigue crack initiation in polycrystalline nickel, 315
  - ion implantation and fatigue crack initiation: interaction of persistent slip bands with modified surface layers, 331
- Crystal-to-glass transition
  - ion-induced crystal-to-glass transition in alloys, 107
- Crystalline structures
  - different crystalline structures of ruthenium-rich metastable phases formed by ion beam mixing of the binary systems Au-Ru and Ag-Ru, 155
- Debris formation
  - friction behavior and debris formation of titanium-implanted 52100 steel, 285
- Deformation
  - surface deformations caused by high-dose high-energy helium, neon and argon ions, 57
- Deposition
  - fundamental study of TiN films deposited by ion beam mixing, 349
  - fundamentals of ion-beam-assisted deposition: technique and film properties, 181
  - high-power ion-beam-induced melting and mixing in deposited structures, 175
  - simultaneous ion implantation and deposition, 193
- Diffusion
  - diffusion of implanted sodium in nickel and chromium, 43
  - ion-induced radiation-enhanced diffusion of silver in nickel, 223
- Dislocations
  - dislocation structures in near-surface layers of pure metals formed by ion implantation, 337
- Dose
  - microstructure and mechanical properties of high dose nitrogen-implanted iron, chromium and titanium sheets, 291
  - surface deformations caused by high-dose high-energy helium, neon and argon ions, 57
  - target temperature dependence on titanium oxide formation by high-dose oxygen ion implantation into titanium sheets, 79
  - temperature and dose dependence of nitrogen implantation into iron: experimental results and numerical modelling, 25
- Dynamic ion beam mixing
  - structure and properties of titanium carbide grown by dynamic ion beam mixing, 209
- Dynamic ion mixing
  - surface mechanical properties of CuNi and FeAl films produced by dynamic ion mixing, 267
  - surface modification of structural materials by dynamic ion mixing process, 197
- Fatigue
  - effect of ion beam surface modifications on fatigue crack initiation in polycrystalline nickel, 315
  - effect of ion implantation on fatigue, fretting and fretting-corrosion of Ti-6Al-4V, 307
  - ion implantation and fatigue crack initiation: interaction of persistent slip bands with modified surface layers, 331
  - structural characterization and fatigue behaviour of a carbon-implanted pure polycrystalline nickel, 323
- Film properties
  - fundamentals of ion-beam-assisted deposition: technique and film properties, 181
- Fluence
  - temperature and fluence effects in lead-implanted cobalt single crystals, 49
- Fretting
  - effect of ion implantation on fatigue, fretting and fretting-corrosion of Ti-6Al-4V, 307
- Friction
  - examination of wear, hardness and friction of nitrogen-, boron-, carbon-, silver-, lead- and tin-implanted steels with different chromium contents, 261
  - friction and wear studies of oxidized titanium surfaces bombarded with ions in the 100 keV region, 303
  - friction behavior and debris formation of titanium-implanted 52100 steel, 285
- Gold
  - different crystalline structures of ruthenium-rich metastable phases formed by ion beam mixing of the binary systems Au-Ru and Ag-Ru, 155
- Halogen
  - bombardment-induced compositional change with alloys, oxides, oxyalts and halides
  - III. the role of chemical driving forces, 11
- Hardness
  - examination of wear, hardness and friction of nitrogen-, boron-, carbon-, silver-, lead- and tin-implanted steels with different chromium contents, 261
  - microstructure and hardness of titanium and iron surfaces after megaelectronvolt nitrogen implantation, 297
- Heat of formation
  - ion beam mixing of selected binary metal systems with large positive heats of formation, 151
- Helium
  - surface deformations caused by high-dose high-energy helium, neon and argon ions, 57
- Implantation profiles
  - compound formation effects in computing implantation profiles, 67
- Inclusions
  - X-ray studies of krypton, xenon and lead inclusions in aluminium single crystals, 97
- Intermetallics
  - nitrogen ion implantation into the intermetallic compound TiAl, 355
- Ion beam mixing
  - different crystalline structures of ruthenium-rich metastable phases formed by ion beam mixing of the binary systems Au-Ru and Ag-Ru, 155
  - fundamental study of TiN films deposited by ion beam mixing, 349

- ion beam mixing of selected binary metal systems with large positive heats of formation, 151
- metallic glass formation in Cu-Nb by ion beam mixing, 123
- Ion beam polishing**
  - megaelectronvolt ion beam polishing of anodically grown alumina, 63
- Ion implantation**
  - annealing behaviour of nitrogen-ion-implanted 304 stainless steel, 253
  - dislocation structures in near-surface layers of pure metals formed by ion implantation, 337
  - effect of ion implantation on fatigue, fretting and fretting-corrosion of Ti-6Al-4V, 307
  - influence of temperature on the performance of ion-implanted metal-forming tools, 273
  - ion implantation and fatigue crack initiation: interaction of persistent slip bands with modified surface layers, 331
  - ion implantation in ceramics—residual stress and properties, 361
  - ion implantation in Japan in non-semiconductor fields, 369
  - nitrogen ion implantation into the intermetallic compound TiAl, 355
  - present status of ion implantation in non-semiconductor materials in China, 377
  - simultaneous ion implantation and deposition, 193
  - surface precipitation of natural and ion-implanted lithium and boron in metals, 89
  - target temperature dependence on titanium oxide formation by high-dose oxygen ion implantation into titanium sheets, 79
  - transport processes in solids during ion implantation, 1
- Iron**
  - ion beam effects on Fe-Ni bilayers, 161
  - microstructure and hardness of titanium and iron surfaces after megaelectronvolt nitrogen implantation, 297
  - microstructure and mechanical properties of high dose nitrogen-implanted iron, chromium and titanium sheets, 291
  - mixing and annealing effects in the krypton-irradiated Fe-Pd system, 165
  - surface mechanical properties of CuNi and FeAl films produced by dynamic ion mixing, 267
  - temperature and dose dependence of nitrogen implantation into iron: experimental results and numerical modelling, 25
- Krypton**
  - mixing and annealing effects in the krypton-irradiated Fe-Pd system, 165
  - pressure effects of krypton bubbles on the host aluminium lattice as probed by  $^{57}\text{Co}$  impurity atoms, 103
  - X-ray studies of krypton, xenon and lead inclusions in aluminium single crystals, 97
- Lead**
  - temperature and fluence effects in lead-implanted cobalt single crystals, 49
  - X-ray studies of krypton, xenon and lead inclusions in aluminium single crystals, 97
- Lithium**
  - surface precipitation of natural and ion-implanted lithium and boron in metals, 89
- Manganese**
  - amorphization process in manganese-implanted aluminium thin films and single crystals: effects of strains and target temperature, 139
- Mechanical properties**
  - microstructure and mechanical properties of high dose nitrogen-implanted iron, chromium and titanium sheets, 291
  - surface mechanical properties of CuNi and FeAl films produced by dynamic ion mixing, 267
- Melting**
  - high-power ion-beam-induced melting and mixing in deposited structures, 175
- Metallic glass**
  - metallic glass formation in Cu-Nb by ion beam mixing, 123
- Metallic multilayers**
  - low-temperature mixing of metallic multilayers with light ions, 171
- Microstructure**
  - microstructure and hardness of titanium and iron surfaces after megaelectronvolt nitrogen implantation, 297
  - microstructure and mechanical properties of high dose nitrogen-implanted iron, chromium and titanium sheets, 291
- Mixing**
  - high-power ion-beam-induced melting and mixing in deposited structures, 175
  - low-temperature mixing of metallic multilayers with light ions, 171
  - mixing and annealing effects in the krypton-irradiated Fe-Pd system, 165
- Molybdenum**
  - ion beam modification of  $\text{MoS}_x$  films on metals, 343
- Neon**
  - surface deformations caused by high-dose high-energy helium, neon and argon ions, 57
- Nickel**
  - diffusion of implanted sodium in nickel and chromium, 43
  - effect of ion beam surface modifications on fatigue crack initiation in polycrystalline nickel, 315
  - ion beam effects on Fe-Ni bilayers, 161
  - ion-induced radiation-enhanced diffusion of silver in nickel, 223
  - phase transformations of a nitrogen-implanted austenitic stainless steel (X10 CrNiTi 18-9), 229
  - structural characterization and fatigue behaviour of a carbon-implanted pure polycrystalline nickel, 323
  - surface mechanical properties of CuNi and FeAl films produced by dynamic ion mixing, 267
  - temperature dependence of amorphization and precipitation processes in  $\text{Ni}^{+}$ - and  $\text{N}^{+}$ -implanted  $\text{Ni}_x\text{Ti}_{1-x}$  alloys, 133
  - transmission electron microscopy study of amorphization and precipitation in  $\text{Ni}^{+}$ -implanted aluminium, 145
- Niobium**
  - metallic glass formation in Cu-Nb by ion beam mixing, 123
- Nitrogen**
  - annealing behaviour of nitrogen-ion-implanted 304 stainless steel, 253
  - effects of  $\alpha$ -particle irradiation on carbonitrides produced in a nitrogen-implanted low-carbon steel, 31

- examination of wear, hardness and friction of nitrogen-, boron-, carbon-, silver-, lead- and tin-implanted steels with different chromium contents, 261
- fundamental study of TiN films deposited by ion beam mixing, 349
- glancing-angle X-ray diffracton and X-ray photoelectron spectroscopy studies of nitrogen-implanted tantalum, 73
- microstructure and hardness of titanium and iron surfaces after megaelectronvolt nitrogen implantation, 297
- microstructure and mechanical properties of high dose nitrogen-implanted iron, chromium and titanium sheets, 291
- nitride formation at metal surfaces by Ar<sup>+</sup> ion bombardment in nitrogen atmosphere, 203
- nitrogen ion implantation into the intermetallic compound TiAl, 355
- phase transformations of a nitrogen-implanted austenitic stainless steel (X10 CrNiTi 18-9), 229
- physical properties of TiN thin films, 217
- post-implantation heat treatment of nitrogen-implanted 440C stainless steel, 257
- temperature and dose dependence of nitrogen implantation into iron: experimental results and numerical modelling, 25
- temperature dependence of amorphization and precipitation processes in Ni<sup>+</sup>- and N<sup>+</sup>-implanted Ni<sub>x</sub>Ti<sub>1-x</sub> alloys, 133
- transmission electron microscopy investigation of the structural transformations in titanium or TiAl implanted with nitrogen, carbon, oxygen and boron, 83
- Non-semiconductors**
- ion implantation in Japan in non-semiconductor fields, 369
- present status of ion implantation in non-semiconductor materials in China, 377
- Numerical modelling**
- temperature and dose dependence of nitrogen implantation into iron: experimental results and numerical modelling, 25
- Oxidation**
- composition and sliding contact behavior of oxidized titanium-implanted 52100 steel, 279
- friction and wear studies of oxidized titanium surfaces bombarded with ions in the 100 keV region, 303
- Oxygen**
- bombardment-induced compositional change with alloys, oxides, oxysalts and halides
- III. the role of chemical driving forces, 11
- megaelectronvolt ion beam polishing of anodically grown alumina, 63
- target temperature dependence on titanium oxide formation by high-dose oxygen ion implantation into titanium sheets, 79
- transmission electron microscopy investigation of the structural transformations in titanium or TiAl implanted with nitrogen, carbon, oxygen and boron, 83
- Palladium**
- mixing and annealing effects in the krypton-irradiated Fe-Pd system, 165
- Persistent slip bands**
- ion implantation and fatigue crack initiation: interaction of persistent slip bands with modified surface layers, 331
- Phase transformations**
- phase transformations of a nitrogen-implanted austenitic stainless steel (X10 CrNiTi 18-9), 229
- Physical properties**
- physical properties of TiN thin films, 217
- Precipitation**
- surface precipitation of natural and ion-implanted lithium and boron in metals, 89
- temperature dependence of amorphization and precipitation processes in Ni<sup>+</sup>- and N<sup>+</sup>-implanted Ni<sub>x</sub>Ti<sub>1-x</sub> alloys, 133
- transmission electron microscopy study of amorphization and precipitation in Ni<sup>+</sup>-implanted aluminium, 145
- Pressure effects**
- pressure effects of krypton bubbles on the host aluminium lattice as probed by <sup>57</sup>Co impurity atoms, 103
- Ruthenium**
- different crystalline structures of ruthenium-rich metastable phases formed by ion beam mixing of the binary systems Au-Ru and Ag-Ru, 155
- Silver**
- different crystalline structures of ruthenium-rich metastable phases formed by ion beam mixing of the binary systems Au-Ru and Ag-Ru, 155
- ion-induced radiation-enhanced diffusion of silver in nickel, 223
- Single crystals**
- amorphization process in manganese-implanted aluminium thin films and single crystals: effects of strains and target temperature, 139
- temperature and fluence effects in lead-implanted cobalt single crystals, 49
- X-ray studies of krypton, xenon and lead inclusions in aluminium single crystals, 97
- Sliding contact behavior**
- composition and sliding contact behavior of oxidized titanium-implanted 52100 steel, 279
- Sodium**
- diffusion of implanted sodium in nickel and chromium, 43
- Stainless steel**
- annealing behaviour of nitrogen-ion-implanted 304 stainless steel, 253
- phase transformations of a nitrogen-implanted austenitic stainless steel (X10 CrNiTi 18-9), 229
- post-implantation heat treatment of nitrogen-implanted 440C stainless steel, 257
- wear resistance improvement and structural modifications of B<sup>+</sup>-implanted austenitic stainless steel, 245
- Strain**
- amorphization process in manganese-implanted aluminium thin films and single crystals: effects of strains and target temperature, 139
- Stress**
- ion implantation in ceramics—residual stress and properties, 361
- Structural transformations**
- transmission electron microscopy investigation of the structural transformations in titanium or TiAl implanted with nitrogen, carbon, oxygen and boron, 83

## Sulphur

ion beam modification of  $\text{MoS}_x$  films on metals, 343

## Tantalum

glancing-angle X-ray diffraction and X-ray photoelectron spectroscopy studies of nitrogen-implanted tantalum, 73

## Temperature

amorphization process in manganese-implanted aluminium thin films and single crystals: effects of strains and target temperature, 139

influence of temperature on the performance of ion-implanted metal-forming tools, 273

temperature and dose dependence of nitrogen implantation into iron: experimental results and numerical modelling, 25

temperature and fluence effects in lead-implanted cobalt single crystals, 49

temperature dependence of amorphization and precipitation processes in  $\text{Ni}^+$ - and  $\text{N}^+$ -implanted  $\text{Ni}_x\text{Ti}_{1-x}$  alloys, 133

## Thin films

amorphization process in manganese-implanted aluminium thin films and single crystals: effects of strains and target temperature, 139

physical properties of TiN thin films, 217

## Titanium

composition and sliding contact behavior of oxidized titanium-implanted 52100 steel, 279

effect of ion implantation on fatigue, fretting and fretting-corrosion of Ti-6Al-4V, 307

friction and wear studies of oxidized titanium surfaces bombarded with ions in the 100 keV region, 303

friction behavior and debris formation of titanium-implanted 52100 steel, 285

fundamental study of TiN films deposited by ion beam mixing, 349

microstructure and hardness of titanium and iron surfaces after megaelectronvolt nitrogen implantation, 297

microstructure and mechanical properties of high dose nitrogen-implanted iron, chromium and titanium sheets, 291

nitrogen ion implantation into the intermetallic compound TiAl, 355

phase transformations of a nitrogen-implanted austenitic stainless steel (X10 CrNiTi 18-9), 229

physical properties of TiN thin films, 217

structure and properties of titanium carbide grown by dynamic ion beam mixing, 209

target temperature dependence on titanium oxide formation by high-dose oxygen ion implantation into titanium sheets, 79

temperature dependence of amorphization and precipitation processes in  $\text{Ni}^+$ - and  $\text{N}^+$ -implanted  $\text{Ni}_x\text{Ti}_{1-x}$  alloys, 133

titanium implantation into a high speed steel: distribution parameters and CEMS characterization, 37

transmission electron microscopy investigation of the structural transformations in titanium or TiAl implanted with nitrogen, carbon, oxygen and boron, 83

## Transmission electron microscopy

transmission electron microscopy investigation of the structural transformations in titanium or TiAl implanted with nitrogen, carbon, oxygen and boron, 83

transmission electron microscopy study of amorphization and precipitation in  $\text{Ni}^+$ -implanted aluminium, 145

## Transport processes

transport processes in solids during ion implantation, 1

## Vanadium

effect of ion implantation on fatigue, fretting and fretting-corrosion of Ti-6Al-4V, 307

## Wear

examination of wear, hardness and friction of nitrogen-, boron-, carbon-, silver-, lead- and tin-implanted steels with different chromium content, 261

friction and wear studies of oxidized titanium surfaces bombarded with ions in the 100 keV region, 303

wear resistance improvement and structural modifications of  $\text{B}^+$ -implanted austenitic stainless steel, 245

## X-ray diffraction

glancing-angle X-ray diffraction and X-ray photoelectron spectroscopy studies of nitrogen-implanted tantalum, 73

## X-ray photoelectron spectroscopy

glancing-angle X-ray diffraction and X-ray photoelectron spectroscopy studies of nitrogen-implanted tantalum, 73

## Xenon

X-ray studies of krypton, xenon and lead inclusions in aluminium single crystals, 97
